

Lena Chaihorsky

Vice President, Payer Innovation

Alva10

Lena is the co-founder and Vice President of Payer Innovation at Alva10. With a background in biology and mathematics from Tufts, she is a skilled healthcare executive with a proven track record of developing and commercializing impactful diagnostic tests that decrease medical spending and bring Precision Medicine to healthcare. Today, Lena leverages her extensive leadership experience in sales, national contracting, and all aspects of reimbursement to enable insurers and employers to optimize their therapeutic and downstream medical spending through use of innovative and novel diagnostics. Her work on commercial approaches to health economics data analysis led to her appointment as co-chair of the World Economic Forum's workgroup dedicated to the economics of rare disease data federations in 2019. She is active within the Tufts Alumni Career Networking Community, and a Study Design Task Force member at STRIPE, a public-private task force dedicated to improving access to Pharmacogenomics within the American Society of Pharmacovigilance.
